Work Experience

Backup Frontend Developer

Telkom University

September 2022 - Now

Bandung, Kota Bandung, Jawa Barat, Indonesia

As a frontend developer at Telkom University, I am responsible for creating user interface displays and interactions using HTML, CSS, JavaScript, PHP, and several libraries such as JQuery, GSAP, and SASS. I am also required to understand more about the Laravel Framework, because the backend system used is Laravel. I have successfully completed my duties and responsibilities to create web pages with satisfactory results. I was also given the trust to do DevOps on the server that has been provided. I love working with the team and keep learning the latest frontend technology plus backend bit by bit.

Frontend Developer

Felix Wibowo Design Interior

March 2022 - Now

Bandung, Kota Bandung, Jawa Barat, Indonesia

As a frontend developer in this project, I am responsible for creating the appearance and interaction of the user interface using HTML, CSS, JavaScript and several libraries such as JQuery, GSAP, etc. I have successfully completed a project that makes a website or web application more user-friendly and aesthetically pleasing starting from its appearance and animation. I was also given the trust to do DevOps on the server that has been provided. I enjoy working with the team and keep learning the latest frontend technologies.

Web Developer

CV Sunda Jaya Corp

March 2022 - May 2022

Padalarang, Kec. Padalarang,
Kabupaten Bandung Barat, Jawa
Barat, Indonesia

As a web developer at CV Sunda Jaya Corp, I am responsible for creating and managing websites and applications using HTML, CSS, JavaScript and PHP technologies. I also have experience in integrating with backend systems such as Database and RESTfull API. I successfully completed a project that increased the visibility and traffic of a company's website. I also enjoy working with the team and keep learning the latest web technologies.

Network Technician

CV Magaze Wira Pratama Mutual Sinergi Infinite

September 2020 - December 2020

Kab. Pangandaran, Jawa Barat,
Indonesia

As a network technician for the company, I am responsible for managing, optimizing and troubleshooting the LAN, RT-RW Net and WiFi networks as well as providing technical support to users. I have the ability to configure network devices such as routers, switches, wireless access points, and perform Fiber Optic cabling and understand TCP/IP, DNS, DHCP, and VLAN network protocols. I always try to keep the company network stable and keep learning to improve my skills.

Education

2021 - 2025

Sekolah Tinggi Teknologi Bandung

Teknik Informatika

Until now, while pursuing a bachelor's degree in Informatics Engineering at the Bandung Technology College, I studied IT concepts and technology, applied knowledge through projects, and participated in extracurricular activities that improved my abilities in programming and teamwork. This experience provides a solid foundation in IT.

2018 - 2021

SMK Negeri 1 Cijulang

Teknik Komputer dan Jaringan

While studying at SMK N 1 Cijulang majoring in Computer and Network Engineering, I studied theory and practice in IT, applied knowledge through practical projects, and received several certificates from leading vendors. This experience gave me a solid foundation in the IT field.
